Progressions of Returns

and

Death Time of Elizabeth II

Cemal Cicek

15 September 2022

Preface

There are many absurd, false claims in classical/traditional astrology. One of them, for example, is that the sun is the father and the moon is the mother. And this is repeated and copied again and again by the astrologers. I have proven, with my work, The Signifer of Father[1], and with other examples I have published, that Jupiter represents the Father. Despite this work, the "astrologers" make the same mistakes and pretend that this work does not exist. Then I know they are not concerned with astrology.

Another claim of theirs is that one should never consult the solar and lunar returns as individual charts. One should interpret the returns together with radix. I have committed this sin in this work and have taken returns as radix and calculated progressions from them. Result was very amazing as can be seen below. At least for me. Since the many others already know everything, they do not need this one. One should be sure that many undiscovered gems await us if we keep an open mind.

We take solar (lunar, planets return), for the time we want to examine, as radix and we calculate the progressions from this solar (lunar, planets return).

It is a useful technique for astrological predictions when higher harmonics are used. Otherwise you would not see anything except slight AC-MC movements because the time span for progressions is very short.
It is also very useful and precise technique for birth time verification and birth time correction.

I assume that the reader knows at least my works. Therefore, I have dispensed with the meanings of the planetary pictures.

Used :

1- Krishnamurti Ayanamsa : 23°45′56" for Year 2000.
Speed of precession is 50.2388475.
2- Mean Node
3- Harmonics 256, 4096, 16384, 65536, 262144

In my work "Alfred Witte and I" I compared our data. Here, with this new technique, I compare the data further.

Witte, Alfred

Radix of Alfred Witte : 2 March 1878, 21:12 LMT, Hamburg
Death of my father, 15.05.1999, at ca.01:00 , Istanbul, Turkey.

Solar Return as Radix

Tertiary Progression (Harmonic 256)

$$p\ \odot = r\ \odot/\, \text{♃} = r\ \odot/\Psi$$

$$p\ \odot = 0°\ 39'\ 49''$$

$$r\ \odot/\text{♃} = 1°\ 22'\ 06'' - 0°\ 42'\ 11'' = 0°\ 39'\ 55''$$

$$r\ \odot/\Psi = 0°\ 18'\ 30'' + 0°\ 21'\ 05'' = 0°\ 39'\ 35''$$

$$p\ \text{♂}/\text{♄} = p\ \text{♃} = r\ \text{♅}$$

$$p\ \text{♂}/\text{♄} = 1°\ 3'\ 42''$$

$$p\ \text{♃} = 1°\ 3'\ 36''$$

$$r\ \text{♅} = 1°\ 3'\ 40''$$

Radix of Alfred Witte : 2 March 1878, 21:12 LMT, Hamburg
Death of my father, 15.05.1999, at ca.01:00 , Istanbul, Turkey.

Solar Return as Radix

Minor Progression (Harmonic 256)

p ♃/♆ = r ♃

p ♃/♆ = 0° 5′ 45′′ + 0° 21′ 05′′ = 0° 26′ 46′′

r ♃ = 0° 26′ 39′′

p ♂/♄ = p ♃

r ♂/♄ = 1° 21′ 25′′

p ♃ = 0° 17′ 52′′ + 0° 21′ 05′′ + 0° 42′ 11′′ = 1° 21′ 08′′

Radix of Alfred Witte : 2 March 1878, 21:12 LMT, Hamburg
Death of my father, 15.05.1999, at ca.01:00 , Istanbul, Turkey.

The True Time of Death of Elizabeth II

I am explaining here step by step how to find right death time and right birth time because death time depends on birth time.

Step 1 : First we calculate the Returns (Solar, Lunar and Planetary Returns, such as Saturn Return, because this is about death. If the expected event was marriage, we would have examined Venus Return. If it is about the mother, we also study Venus Return, for the father we also study Jupiter Return).

Here I show all three Returns, Solar, Lunar and Saturn Return. As we can see, all three returns show possible death.

The birth time : 02:41:04

Solar Return 2022 (Harmonic 256)

solar $\mars / \saturn = r \odot$

Elizabeth II, Queen of England
21 April 1926 Wed 2:41:04 (GMT+1) 51n30 0w10
London, England

Sidereal (23°45'56", 50.2388475")
Ayanamsa 22°43'56"
Ecliptic
Geocentric
Placidus
H256 1°24'

Lunar Return 25 August 2022 (Harmonic 256)

lunar $\odot$ = r $\male$ / $\saturn$

Elizabeth II, Queen of England
21 April 1926 Wed   2:41:04 (GMT+1) 51n30 0w10
London, England
Sidereal (23°43'56", 50.2386473")
Ayanamsa 22°43'56"
Ecliptic
Geocentric
Placidus
H256 1°24'

Saturn Return 16 November 2014 (Harmonic 256)

return $\odot$ = r $\male$ / $\saturn$

Elizabeth II, Queen of England
21 April 1926 Wed   2:41:04 (GMT+1) 51n30 0w10
London, England
Sidereal (23°43'56", 50.2386473")
Ayanamsa 22°43'56"
Ecliptic
Geocentric
Placidus
H256 1°24'
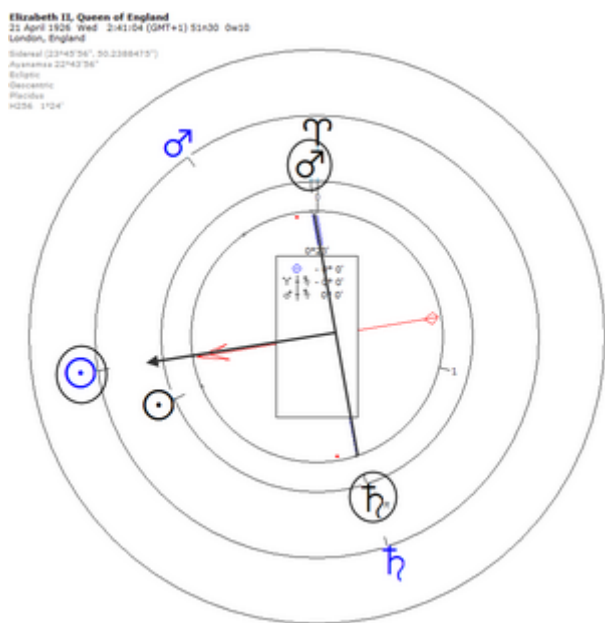

Step 2 : If we assume that in the respective return the event we expect will take place, we calculate the progressions of the returns.

Lunar Return as Radix

Secondary Progression (Harmonic 4096)

When we run the progressed planets day by day in the small harmonics and hour by hour in the higher haremonics like 4096, we get 08.09.2022 at 10:40:39 such a picture :

$$_p \odot/\mathord{\male} \; = \; _r \odot/\hbar$$
$$_p \odot/\hbar \; = \; _p \mathord{\male}/\hbar$$

Lunar Return
25 August 2022 Thu 16:59:59 (GMT+1) 51n30 0w10
London, England

Sidereal (23°45'56", 50.2388475")
Ayanamsa 24° 4'43"
Ecliptic
Geocentric
Placidus
H4096 0°05'

44
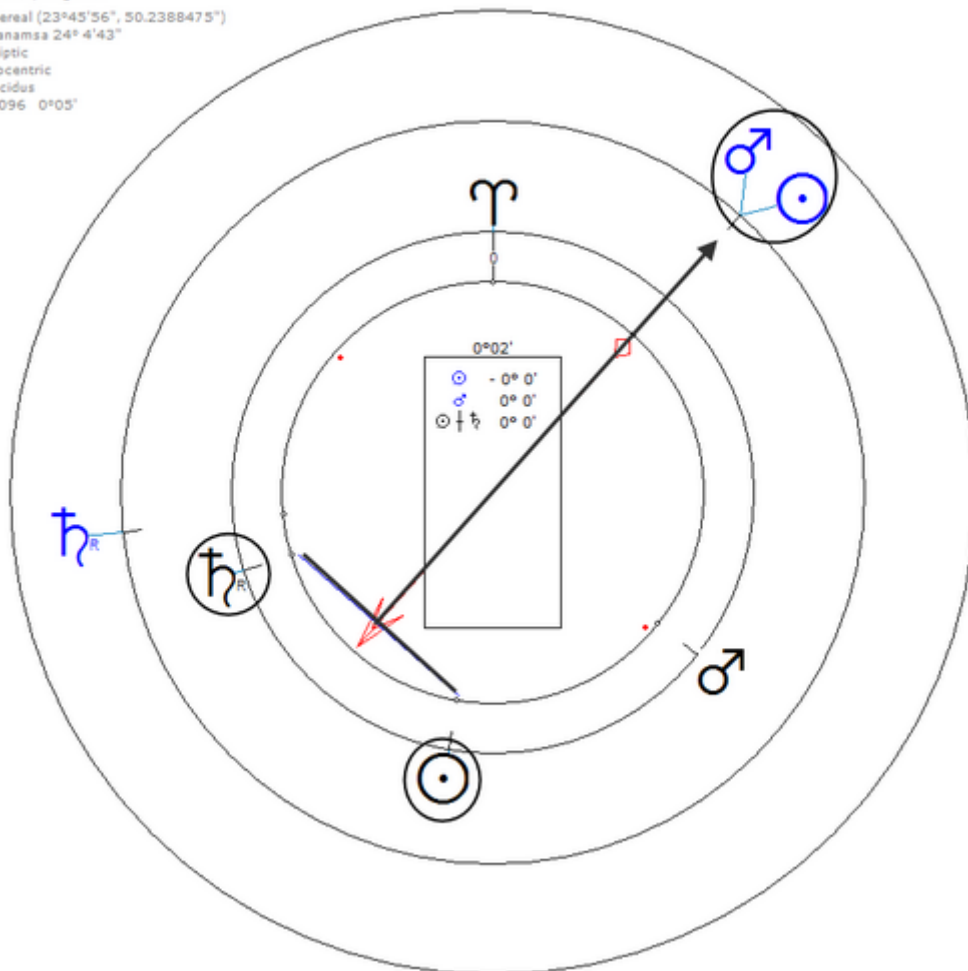

When we compare this transit time 10:40:39 with the radix, we get very interesting pictures : The planetary pictures I show below are exact to the second.

Transit at 10:40:39 (Harmonic 4096)

t MA/SA = r SU
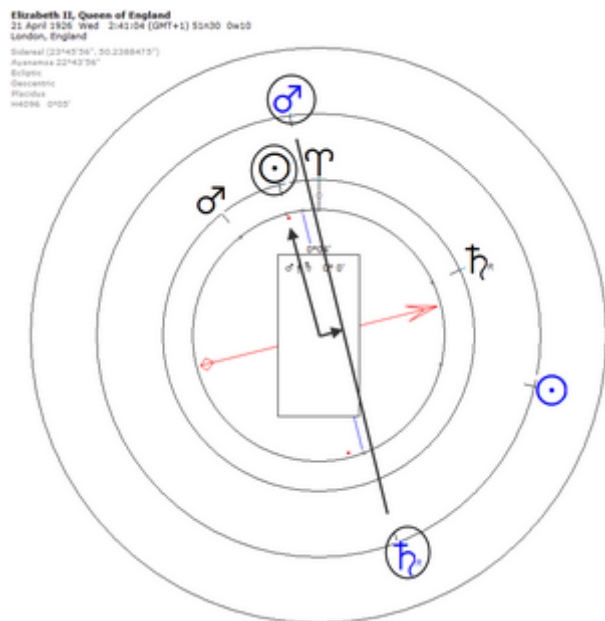

Transit at 10:40:39 (Harmonic 4096)
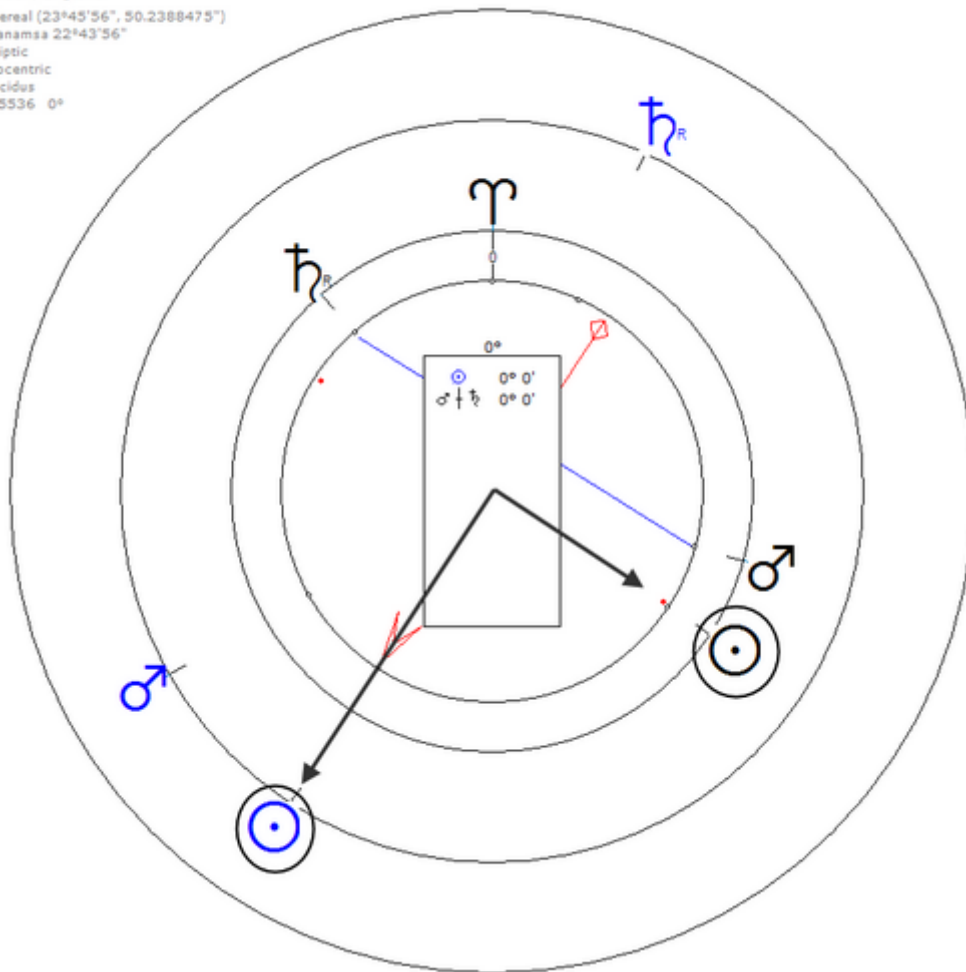

t SU = r MA/SA
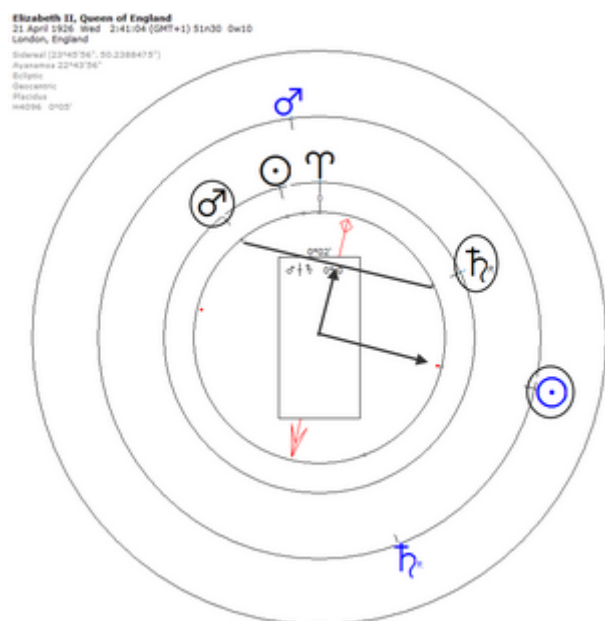

Step 3 : In my first work, Microastrology[2], I wrote that the sun positions of birth time and death time must be harmonic to each other to the second. Here we check whether this is the case.

Transit at 10:40:39 (Harmonic 65536)

t SU = r SU

Elizabeth II, Queen of England
21 April 1926 Wed   2:41:04 (GMT+1) 51n30 0w10
London, England

Sidereal (23°45'56", 50.2388475")
Ayanamsa 22°43'56"
Ecliptic
Geocentric
Placidus
H65536 0°

[2] https://ia800109.us.archive.org/19/items/microastrology/microastrology.pdf

Step 4 : In this step we will precisely determine the birth and death time.

In my work " The exact time of death and birth time correction " I have claimed :

It must be in harmonic 262144 :

$$\text{♂} \, t \, / \, \text{♄} \, t = \text{☉} \, t = \text{☉} \, n$$

Transit at 10:40:39 (Harmonic 262144)

Here the transit sun is not exact with the transit MA/SA. Therefore we let the time run back a little bit.

$$_t\text{♂}/\text{♄} \quad _t\text{☉}$$

Elizabeth II, Queen of England
21 April 1926 Wed   2:41:04 (GMT+1) 51n30 0w10
London, England

Sidereal (23°45'56", 50.2388475")
Ayanamsa 22°43'56"
Ecliptic
Geocentric
Placidus
H262144 0°

The corrected birth time : 02:40:48
Death time : 10:40:23 (Harmonic 262144)

If we take the birth time and death time 16 seconds back, everything becomes exact to the second. With 16 seconds correction, the equations shown above remain exact.

$$_t\,\mathord{\mathrm{♂}}/\mathord{\mathrm{♄}} = {}_t\,\mathord{\mathrm{☉}} = {}_r\,\mathord{\mathrm{☉}}$$

Elizabeth II, Queen of England
21 April 1926 Wed   2:40:48 (GMT+1) 51n30 0w10
London, England

Sidereal (23°45'56", 50.2388475")
Ayanamsa 22°43'56"

Ayanamsa 24° 4'44"
Ecliptic
Geocentric
Placidus
H16384 0°01'

The prime minister was informed of the Queen's death at 16:30 BST

https://en.wikipedia.org/wiki/Death_and_state_funeral_of_Elizabeth_II

Here we compare different times with harmonic 16384 so that we can see better and more clearly that the death of Elizabeth II was announced much later.

Edward' s Lunar Return as Radix

Secondary Converse Progression at 12:40:23 (Harmonic 16384)
2 hours later than true death time
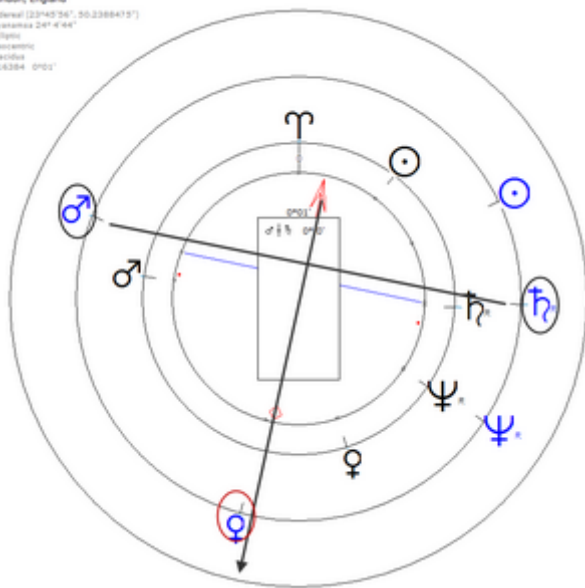

Edward's Lunar Return as Radix

Secondary Converse Progression at 08:40:23 (Harmonic 16384)
2 hours earlier than true death time
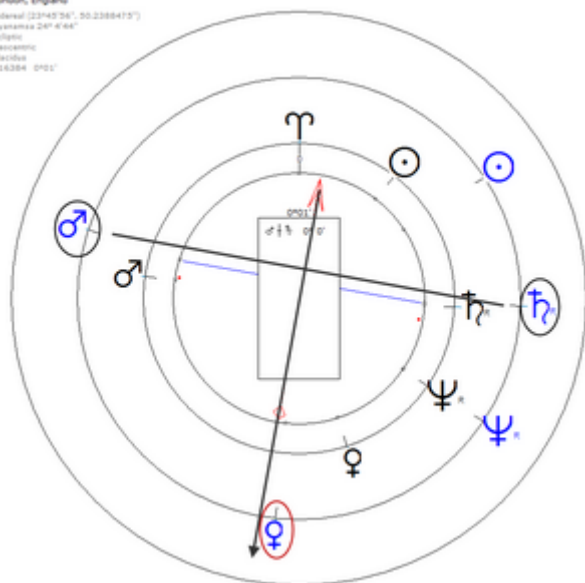

Edward's Solar Return as Radix (Harmonic 4096)

$$♀/♆ = ♂/♄ \text{ (Death of mother)}$$

$$♀/♆ = 0°\ 3'\ 21''$$

$$♂/♄ = 0°\ 2'\ 02'' + 0°\ 1'\ 19'' = 0°\ 3'\ 21''$$

This solar shows that this year the separation from a woman because of death. Here in this case the separation from the mother.

Solar Return
11 March 2022 Fri 17:11:33 (GMT) 51n30 0w10
London, England
Sidereal (23°45'56", 50.2388475")
Ayanamsa 24° 4'17"

H65536 0°

The prime minister was informed of the Queen's death at 16:30 BST

https://en.wikipedia.org/wiki/Death_and_state_funeral_of_Elizabeth_II

Here we compare different times with harmonic 65536 so that we can see better and more clearly that the death of Elizabeth II was announced much later.
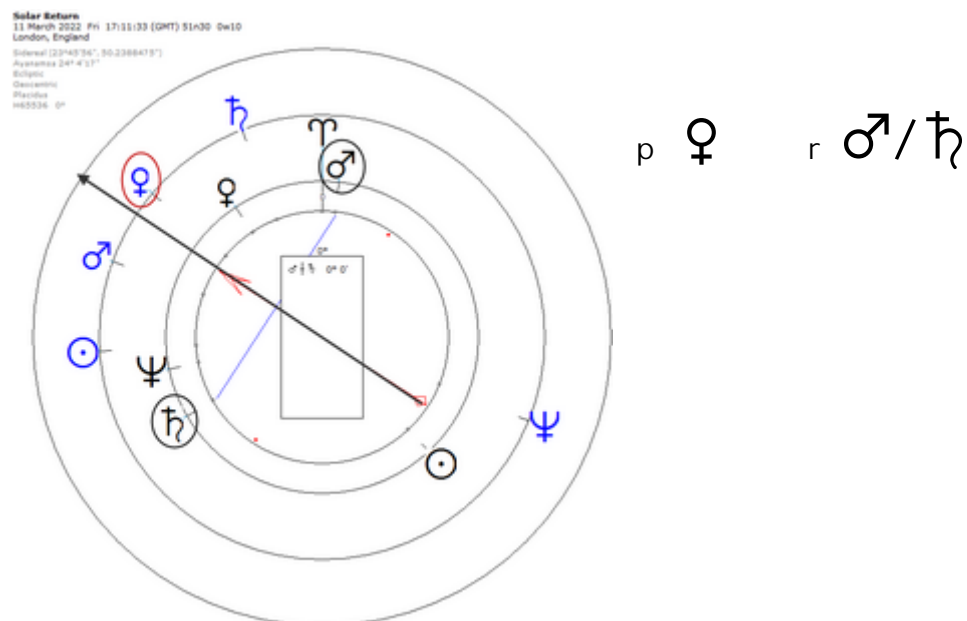

Edward's Solar Return as Radix

Secondary Progression at 11:40:23 (Harmonic 65536)
1 hour later than true death time
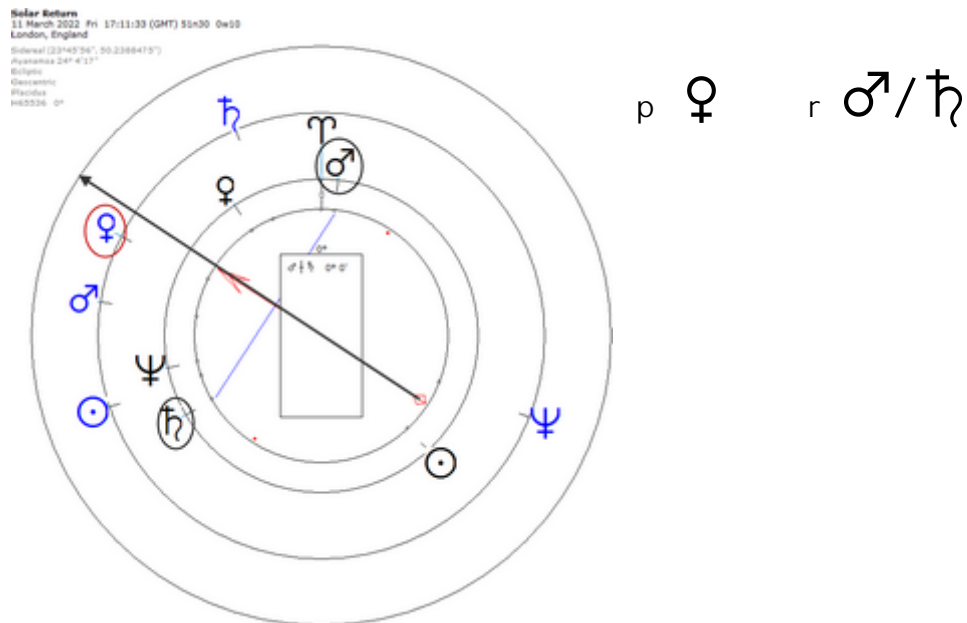

Edward's **Solar** Return as Radix

Secondary Progression at 09:40:23 (Harmonic 65536)
1 hour earlier than true death time

Edward's Venus Return as Radix

Secondary Progression at 10:40:23 (Harmonic 65536)

$$p\,♀/Ψ \;=\; p\,☉/Ψ \;=\; p\,♂/♄ \;=\; r\,☉$$

$p\,♀/Ψ$ = 0° 0′ 09″

$p\,☉/Ψ$ = 0° 0′ 04″ + 0° 0′ 05″ = 0° 0′ 09″

$p\,♂/♄$ = 0° 0′ 14″ - 0° 0′ 05″ = 0° 0′ 09″

$r\,☉$ = 0° 0′ 04″ + 0° 0′ 05″ = 0° 0′ 09″

Since the whole circle in Harmonic 65536 is only 20 seconds, we subtract /add half (10 seconds) or quarter (5 seconds).

Half an hour later or half an hour earlier, the exact equations shown above no longer exist.
